

QUALITY ASSURANCE

Pharmaceuticals • Biologics • Vaccines • Chemicals • Agrochemicals

Overview

IITRI has been performing GLP safety studies since the regulations were put in place in 1979. During this time we have performed thousands of GLP studies, and have remained in good standing with all regulatory agencies.

Our Quality Assurance team is all credentialed as Registered Quality Assurance Professionals in GLP (RQAP-GLP), and has experience monitoring studies designed to comply with U.S. FDA and EPA regulations, as well as international regulations.

Training

The Quality Assurance staff receives ongoing training in the application of and adherence to GLP regulations. In addition, the Quality Assurance staff provides extensive GLP training on a variety of topics to all IITRI employees throughout the year.

Regulatory Record

Our facilities are routinely inspected by the FDA and EPA, with excellent results that are available upon the request of our sponsors.
